

Richmond House,
Charlotte Road,
Edgbaston, Birmingham,
Angleterre, 26/8/90.

My dear Sir,

I am writing a large book on the
"Physiology of the Invertebrata". Would
you kindly help me by sending any
of your excellent papers, etc., on the
subject?

As you are such an authority on this
subject your help would be invaluable
to me.

I shall have much pleasure in
sending you a copy of my book
when it is published.

Hoping I am not troubling
you too much, and thanking

you in anticipation.

Believe me, My dear Sir,

Yours very truly,

A. B. Griffiths,

[Docteur ès-Sciences, Professeur
de Chimie et de Biologie, Membre
de la Société Chimique de Paris, etc.]

A decorative flourish consisting of a horizontal line with a central loop and a small vertical line extending downwards from the center.
