

THE INSTITUTE OF JAMAICA

*For the Encouragement of Literature,
Science and Art.*

KINGSTON, JAMAICA.

20th July 1908⁸⁹

Dear Sir:

Accompanying this I have pleasure in forwarding you reprints of one or two of my recent papers on the Actinaria and Madreporaria. In return I shall greatly appreciate any reprints of your own papers which you may be in a position to forward me. Here, in Jamaica, I am largely cut off from scientific literature, except such as I can personally obtain. I am especially desirous of a copy of your valuable paper "Fauna du Golfe de Lion, Coralliaires, Zoanthaires, Scleroderimes". During my recent visit to the United States I had the opportunity of seeing your Memoir at the Johns Hopkins University, but have no copy of it here.

With expressions of the highest esteem of your long continued actinological work,

Believe me to be,

Yours very sincerely,

J. E. Duerden.

Prof. Henri de Lacaze-Duthiers,
Faculté de Sciences,
Paris,
France.
