

July 22. 1851

Barometer Rectory,

St. Peter's Church,

Co. Durham.

Dear Sir,

Pray accept my best
thanks for your Report
on the Progress of the
Roscoff Botanical Station,
and especially for your
elaborate and important
section of the remarkable
Crustacean Parasite Scarus
Gerardii, it is a most
curious specimen certainly.
The Crustacee seen about

to the birds - insect in
Humboldt & Bonpland. I have
been lately drawing up a
list of the Fructifera of the
North Atlantic & Mediterranean
Sea & Pacific & have 3000
Species in that list (not yet
synonymized at any rate)

I am just leaving
home for six weeks
studying in Norway
Yours very faithfully
A. M. S. P. S. P.
