"Lieber's"

Aug: 23rd 1866

Dear Sir,
I send you a copy of a note of
recommendation to you given me by Mr.
Van Breda, who was here last year.
I keep the original for the sake of the
autograph. The reason I write to you
is to call your attention to what I have
said at page 77 of a magazine which
I send with this letter, (to which little
journal I occasionally contribute) about
some observations of yours on Prallan's

and if you can assist
me in clearing-up what seems to me to
be an anachronism, I shall feel
thankful, as I make a speciality of
the conservation of living marine
animals.

In what manner could
I obtain for our Aquarium at Hamburg
some specimens of Scyllium rubrum, or
any other zoophytes, (especially of the
Medusa kind,) found in the Mediterranean
sea? I want them alive. Yours truly,
W. Alfred Slog.

Mme H. Saage - Dalkiers, &c, &c, &c.

~~copy.~~

"Je recommande particulièrement à
mon ami Saage - Dalkiers, Monsieur
Slog, qui a résidé à Hambourg
le plus bel Aquarium qui existe."

Savois

28th Oct. 1865.

Van Beneden"
