

Den Haag

June 28/84

Hotel de l'Europe.

Professor Lacaze Duthiers

Director of the Laboratory
at Roscoff.

Honored Sir:

I write to beg permission to enjoy the privilege of working at the Laboratory at Roscoff during the month of July, in case I can obtain mature eggs of asterias or of some other echinoderm having translucent eggs suitable for cytological work.

Respectfully

Ethan Allen Andrews
Associate Professor of Biology
Johns Hopkins University
Baltimore.

Thanking you most warmly, both
in my own name and in that of
Mrs. Andrews, for the privilege of
occupying a room in the Laboratory
in addition to the table and thus
making our visit to Roscoff quite
perfect. The terms and conditions
accompanying the permission to occupy
a sleeping room here I wait to
learn from the letter mentioned
in the telegram just received.

We are much pleased with the
celerity with which fine material
for work upon the cytology of
Echiniscus *ovata* has been obtained
and full of hope for the success
of our work upon certain phases
of protoplasmic structure and
activity.

Again thanking you most cordially

Yours respectfully

E. A. Andrews.

Roscoff July 14 /94.

Professor Henri Lacaze Duthiers
Directeur du Laboratoire Arago
etc etc.

Dear Sir;

Your very kind letter
of July the sixth granting me
permission to work at the Laboratory
of Roscoff would have been acknowledged
sooner but for my sudden departure
from the Hague and the consequent
delay in the receipt of the letter.

The letter was forwarded to me
here where I had come in the hope
of finding you and gave me great
pleasure as I had seen that the Roscoff
Laboratory is much more attractive
than even the enthusiastic accounts
of M. Bushford Dean had led me
to expect.

I have now also the pleasure of

work may be considered worthy
to be classed among the fruits
of the Roscoff Laboratory.

We regret that our lamentable
ignorance of the French language
has prevented us from coming
into closer contact with our
fellow-workers here and with
the members of the Laboratory
staff.

We take pleasure in expressing
our warmest thanks to you
for the kind permission to work
at and reside in a Laboratory
that seems the more perfect
the more thoroughly it is known;
where the location is so happy,
the equipment so perfect and
the personnel so courteous and
so ready and skilled in all
that aids scientific research.

Most Sincerely,

E. A. Andrews.

Paris, *poste restante*.

Roscoff.

August 11, 1894.

Professor Lacaze-Duthiers.

Dear Sir,

It is with much
regret that Mrs. Andrews and I
find that our month's visit to
Roscoff has come to an end
and that our plans oblige us
to hasten away without having
had the honor of meeting you
nor the pleasure of thanking
you in person for your great
kindness.

Though ill-health has prevented
us from utilizing to the utmost
the rare opportunities we have
been permitted to enjoy here
yet we trust to have done some
work of value upon Echinoderm
eggs and that some day this
